

Codonics Safe Label System Operating Software

Release Notes

Overview

The Codonics Safe Label System™ version 1.2.1 operating software is contained on a USB flash drive in the Administration Tool kit (SLS500-AT-KIT). In the event that an individual SLS 500i requires an operating software reload, the flash drive is provided for use only with direct support by the Codonics Technical Support team.

Operating Software

If the Codonics Technical Support team determines that a Safe Label System requires an operating software reload, it is essential that your SLS 500i version 1.2.1 software flash drive (part number 020-120-004) be available. Codonics Technical Support will work with you to manage the process of reloading the operating software on your Safe Label System.

CAUTION: Operating software reloading must be performed only under the direction of Codonics Technical Support. Please do not attempt this process without the assistance of Codonics.

Technical Support

Please contact Codonics Technical Support at any time.
