

Codonics Horizon Operating Software

Technical Brief

Version 3.1.1 Release Notes

Summary

Horizon® 3.1.1 software provides support for proper edge blanking (border) position around the image on 8x10 DirectVista® media in disposable cassettes.

Products Affected

Imagers with a serial number prefix of 53C, 54C, or 55C are affected. Please contact your Codonics representative for further information.

The Imager Software Version can be determined using the Control Panel by viewing the Imager Info screen from the Utilities menu.

NOTE: Horizon Imagers with serial number prefix 53C, 54C, or 55C cannot be downgraded to any previous software version below 3.0.0. Imagers with a serial number prefix 53C, 54C, or 55C cannot have their software upgraded to 4.0.0 or higher.

New Features (Adaptive Updates)

- ◆ None in this release.

Product Improvements (Perfective Updates)

- ◆ None in this release.

Defects Corrected (Corrective Updates)

- ◆ Corrected the edge blanking border position around the image. The border was printing off the side edge of 8x10 media.

Known Common Issues

- ◆ Previous issues can be found in previous Release Notes.

Known Uncommon Issues

- ◆ Previous issues can be found in previous Release Notes.

Technical Support

If problems occur during software installation, please contact Codonics Technical Support at any time.
